For to staye the flumor... EARC, Gumen seede and beate ist smale as you can hearche you throughe a clothe: Here take as mache oxe galle as may well well it then laye if in a clothe and laye if to the nape of the Necke ... Dry Cupp the Humor of the cycs. TARC a newe laide cook and poore out all fauinge the water in the boltome, then fill It withe faire water then put a little white coperis and a goode peece of Sugar candee into yet and boyle ift togeather and kinne yet then droppe ift into your eyes. For a Ampostume in the throte. and put it in a quarte of maunice, and boyle it togeather from a quarte to a pinte, then drinke it and gargen the in your throte, and now and then eate a figge, Aff is verie Goode for Aff. For an Impostume in the cares... Fuze garlicke and roste if in the fyer, then putt if into the eare and we ist untill the fingestume dothe breake, then laye oyle of roles to iff, if not laye Sallett oyle to it, and take the moole of a be sheepe, and laye to it, and keepe iff verie marme.

A wrater too fasten teethertake, rosemarie, rewe, and sage, and see the them in runninge water untile halfe bee solde awaye: Then pull to yet Bowlarmene Treggans bloude, burnte allome, gommasticke and bunnye so muche as wille make the liquere verie smeete: this will fasten and keepe For the kinges enelle in the throte. Take Broome blasoners and stille them and drinke everie moveninge sixe poonefuls take corralle and beate ill verie smale then mingell ythe withe freshe greace and annoyate the sore withealt. 2.2.2.+ For Decayed eyes in age. take a quarte of streamewater take halfe a spooneful of not copperis and put to yet and enevie daye for the space of nine dayes your muste shake itt togeather and straine off and to keepe off to For the paine of the teethe. take tanefaker and vull of the pill of it, then as muche baye falte and boul at them together and vull in mach

Take, the leaves of holye, and orinde to powder, and pull ytt
in goodd ale or stronge beare, And drinke It fastinge. of meddeine for the coughes. .... the in apostell of runninge water and seethe ist tyll the water be blacke:

then straine yst and pust thereto a quarterne of sugare and sett yst

of anniscede, and halfe an ounce of ginger and brisse them and stamp

them altogeather and voive yst upp withe a listell fine flower, and

pust yst into the Quen after the breade is drawine owot: For a sore Breaste prooned. ... tens Fake one handefull of earbe Bennett, otherwise canked Hemloche and the like Quantitye of Sage, and make the same earbes hote betweene two filestones, that where never occupied, then take one spoonefulle of fine honnye and three spooneful of good read vinneger pull youre boonnie and vineger togeather: mfw a cleane pole dishe and left them that will couer youre breastes and make a hole in the middest thereof that your nippel maye come for the: then dippe the same clothe in the licon and save the same uppon youre brestes as hole as you may e suffer the same and start the same uppon youre brestes as hole as you may e suffer the same start then take the earlies that are kepte warme between the filestones and save them take the earlies that are kepte warme between the filestones are such that the such that the filestones are such that the such and laye them oppon the clothe that is allreadye oppon your bound thus drefe them twice a daye and they will bee hole.

For the stoppinge of the.

Conges Liner and splene proued by Tucche. parfely rootes smallage rootes female, rootes of eache two rootes, polippes, three rootes, of lan rootes an ounce, of hartes tournoe, a handefull, foure Docke rootes: halfe a handefull of Reasons, of the Summe the stones taken out halfe a ounce of the toppes wormeworde: seethe them all in a stone polle, in a pollell of runnings water and halfe a pinte of white wine till the halfe bee confamed. and when yth is colde straine of and drinke thereof moreninge and eneninge bludd warme, withe a quantitye of sugare candre ... To Durge the Liner Longes in and other partes of the boddye .... withe the white of an egge find take a handefull clary as much enception as muche Archangell, and a handefull of growinkell and brule all these togeather and put thereto halfe a quarterne of suger and take thereof two spoonefulls for four moreninges. A. A. A. A. How on A. A. A. A.

FOY the pinne and webbe in the eyes FARC foure or fine rootes of dayces leaves and all, as muche reade pounde them all togeather and straine them withe runninge water, then put as muche white copperis as halfe a peace, and deine bloyle them withe an egge as your los the meddecine before, and and so droppe iff in Sphe sole eyes. . . . . . . Kinge-Henry the cighte his broth FARC, The ende of a knucknell of veale cult in peeces, and a cocke cutte in foure peeces, and put them in a earthen potte, and boyle them an houre and ghalfes and kime itt verie cleane, That there bee no fatte lefte, in ytt: then take a handefull of damalke prunes, and a handefull of realous of the Sunne: the stones plucked perfely rootes foure langedebefe rootes and foure Bourrage rootes a and picke the pithe owt of all these rootes and was he them cleane. and cult their in preces an inche songe: And gwhen the polle is well kimed then putt in the rootes I withe the pruines and realons and halfe a handefull of Banke made cleane and brujed: and a quantitye of annelleedes withe a pynte of white wine, and a quantifye of Motore Field foreather: withe a threed and a liftell quantifye of falte: And when iff is boyled, then take a strainer and straine till and after that throughe a lockerume clothe: then vierto drinche thereof bloude avarmo as offe as your fee goode

PFy lorde of Camterverries

Brothe for a Consumptione. Take, like as before savinge pull thereto a handfull of violett seaves langue beeffe seaves Brorrage seaves and stramberrie seaves, knill togeather of everie one alike quantitye. For the pyles.... Take one handefull of mollett leaves, and wrappe them in a Colework leafe, and rake them in the finbers until they bee well rosted them take them, and putt awaye the Coleworte leafe, and grinde them to a moveter, and putt to vit ovle of roles, and grinde them to reating them take it and laye if to the pyles withe a truffer, and who this moveninge and evenyage. For the flixe.... 

For a scallde or a Burnne... TARC. Two handefull of allouse, one handfull of grounde fuie, halfe a handefull of houndestounge leaves shredd them small and beate them Fogeather: Then put in hate a handefull of sheepes dounge: boyle all thele togeather in freshe greate or newe butter unfallted. Then full into it a good feece of deeres sueft: lest ift boyle Fogeather all one quarter of an hower. Then Fraine ilt and announte the love withealt and laye uppon the fore a hounds tounge leave the shadye side next FO make a seareclothe for a burninge a. Salla. .... Fake, gromen fuie and stramberie leanes, a good quantitye of bothe sortes, and choppe them smalle, then pound them Small with deare suett or mottansoft, then sett them over the fyer, and lest them boyle the space of an hower quarter, of an hower than deepy youve seareclothe in the likequove and lave if on the fore, as wholt as you maye Juffer probatium. .....

.... For a Quinsie in the throte. Take, Cinkfoud and seethe yt m runninge water and put in a potte withe a narrowe mouthe, and lest the paciente holde his mouthe over the pottes mouthe to that the ayre maye enter into his mouthe and his throte: and then when the water maxeth colde: washe his throte withein and without. 000.0.0.0.0.0.0.0.0.0.0.0.0.0.0.0.0 For The Quinfer mille throte Firste let the partie lo diseased bee let bloude on the lefte arme on the liner vaine three or fewer ounces and left him gargolle yt with wine vinneger and water warmed. togedther of eache quantitye alike gargole often tymes. and spite it onte: and lett him methodatume in white wine and left him weate uppon it an house or trocket if the Quin ie be roolne allreadye in his throte: then lett him take that folough -Aplaisfer for the Quinlie. or withe egges, or else without and pull to ytt eighte handfull of mallowes withe as muche water crester boyle Them togedther in milke, untill the become lotte and outill the milke be consumed: Then beate in a bowle untill v come to a plaisteer, and take as muche as you've fishe of the same and make all warme, and putt itt like aplaisters aboute your necke where the mellinge is as holt as you cann suffer it and so chamige all oftentimes .....

- For the Headache. FARC fine or like cloves of garlicke, and pounde them smalle then take seauen or cionte graines of perper and beate them verie grose, them take halfe a soonefull of hoomye and mingel them talltogeather and put the same into a sitted lingen bygge, and Cave the same in the pitte in youre pole, and binde lift faste and if the same chaunce to bee drye before your faine bee gome Then moyste the same withe a littel hoonye, and saye All to agayne .... For the strangury collick and stone take, convanna fencli seede spetnarde annesseede comen seede cimamoone and gastingale of enerie one halfe an ounce groomest seede put halfe da sponder and put halfe da sponder and put halfe da sponder and provider in alle; and drinke ... The same Rike warme and walke after the same . . . . one houre before you cate ordringe .... For an ache. Fake, a spoonefull of sattett oyle and a poonefull of aquanite. one ourrone beate the le togeather and straine vit am annova the place where the ache is .....

A Garossine for the Quinsie in the throte 2.2.2.2. FARC a goode handfull of barlye beinge husked and boyle ill in faire running water: withe a chick untill the barlye breake, then putt thereto a roote or two of Langue beefe two dates one handeful of two reasons of the sunn: a quarter of a pounde of figues two our of corrunce three spoonefuls of robeaton branne, and when these ar box led ofte straine ill and put to ill an ounce of lugarreandy and holde of this a poonefull or trop at a tyme: as warme as . shee can holde: in her mouthe fine or lixe types a daye. Applye this Undernethe the Chille take of violets leaves of mallowes and cammamed of eache a good hand all boyle these until they bee tender and put thereto a lithe roote. beynoe rosted: stampe all these togeather and make it in the forme of a pulltis: pullinge in all the laste three ounces of barrowes great and as muche freshe butter withe two ounces of cyle of roles 

Francine aminstethe 2. 1) lague approved 2.2.263 Mongst, other excelent and approvned medicines for the pestilence I there is home more worthy available when the fave dothe appeare then to take a Socke pullet or chicken and lett the feathers of the taile of hohest parte bee plucked off until the rumpe bee bare, then holde the laide bare of the pullett onto the fore, and the pullett will labore for life and gape: and in the ende will dye: then have one other pullet 170 and loe the like to the patiente: and if that dye yell still the patiente with pullets so longe as annye doe die! for wheth poyelone by the laide chickens is drawine foothe! Then the chickens that be offered thereoff to will live: and then the love prefentlye will asswage: and the partie foortheroithe reconserethe This uneddeine is heleslavie to dviue the venome from t For one that is Burnte withe a Worman C, a pinte of wine, and a quarte of water halfe a yente of hooms all allame, wood byne, sage, planten, rosemanie, and see the then rom a quarte to a pynte and dresse the partye therewithe

Anapyound phister to finue a sore = 30 of the plange to a heade and breake ytt ~... FARC Two lillie rootes one handfull of mallous one handfull of Tower dowe, one handfull of linfeede, stampe all these togeather, malle and boyle it in a quarte of the lees of wine untill it bee thicke then laye it one inche thicke uppon leather broader then the love stand left the borders of the leather bee plaistered withe cordiars max to make it cleave: / ytt shall bringe out the boche in twelde hours and brenke iff shortelye .... An appropried ointemente for aches ---Stampe smallage and pull in Al aquavite, and straine Al Then put thereto Bovegreace and Frayne them well togeather.

and annoynte the patiente before the fyer therent bearing and month A. A. D. D. D. D. D. D. D. D. D. ... For a Chatica or anche..... Place where the paine is: then take mode newelie plucked from the sheepes backe, and laye thereon: and wrapp yt well withe warme clother.

For him or her that is difealed in the knees or in there iountes that the maye not goe Fakt a blacke sheepes heade: and smite him all to peeces moole and all and put it into a potte of water and feethe it all to pappe. and then gett out all the bones: and then lett iff on the feer againe. and put Thereto a goode quantitie of otembale: and lett them teethe with they bee thicke; and then laye it on a peece of leather. all no warme laye if to bis or there jointes: and they shall finde or a greate eale of the wellinge of there knees fromed . . .... Fo cause speedy deliverance of a wome . That is in daunger. THE is to bee noted, that deliverance is easieste when the moone is growince I toward the full, and at the full: and worste towarde and all the chaunge: alle move dannaer when the winde is northeast or northerlye; more calve whan mo the winde is forother weaste or southerly: Telle mootherweste Tallest oyle: and put yth into a pieces bladder: halfe full: And laye of to the Matrice warme: I find witheall drincke this that followethe: the two pennys worthe waight of borax and make it in fine jourder anoth it into a draughte of wine or ale wherein motherworte and sauch hathe been boyled or eller take two pennimorthe majorte of Aritalocs olonge and beate yff into powder and as muche mirhe and a little for this Wricke warme in white wine . Allo the stonnes of a colte dried in an own and made into fine powder. and drincke in white wine is verie ecce

Fortake a Doweder to heale Nime heave and all, and make it in fine powder: and veit on youve tente: To make youre tente, you muste take verie fine lint and wellet, as you role it and drie of by the fier: and by that meanes you shall make it has longe as you will verie stiffe; as longe as the fistal a dothe water yet is not hitled: But when matter dothe come it is keled: ve to kill it a little. fine coprose on the toppe of your tente the This is the same .... powder that Halle dothe all cures-withe A greene salue to heale any wounde or Entle them togeather: and Boyle them in Butter: the straine them, and after put to till some goode here waxe and boyle it againe: and then it is ~. ~. ~. for youre ve. ~. ~. ~. probatume 2.2.2.2.3.3.3.3.3.3.3.3.3.8.8.8.8 For annye swellinge - .... and clarifie the blond take Strange grasse and stamp it and strang it with posset alle and drinke advanght theref every morning and evening and yt shall helpe you it growes comonly in salt marshe ground take the flower of the wallflower wich some call have ease and when you have picked the flower from the Stalkes put the flower into the best sallest oyle you can gitt and vutt into agrase and Jett in in the Sonne and when is hath Stool for & dayes in the sonne Straine the orde from the flower and pritt in fresh flower to the same onle and Sett it in the Sonne againe for 6 days then take out these Flower againse and putt in fresh flower send Sett in the Sonne againe qors weekes and then keepe it till you probal have need of in an approved medicine for young Children that be frestful Take peper that is nevye grostly brused and mingle ist with hony and then spread it upon apeice of new lockram as bigge as is pence and large it upon the namell of the Child and warm accorn hot and laye is upon the same then let 3/t lye all night or all day anery good remedy to stay a lake as you see cause Take the fine crummes of a manchest and lang them asseepe in red rose water and when they be thoughly Steeped eat 2013 Spoonfull in an hours as you thall see cause and is will helpe you an approved medecine for acough take the finest whit frankensence you can gitt wich some Call olibamum and rake agood rosting, aple cun of the crowne and rak out the love and fill it up with the Said obibamum being mad in pouder then put on the top and let it vost in the embert till yt be very sost and then ease on emorning and evening you must use Som suger candy with the ponder of olibamum take the flower of vosemarye and seeth them in white wine with the which wash you face if you drinke it will make you have a sweet breath for abitch when she cannot whelp tak a white billy roote and Stampe it and Straine it and gille it her

aplaister for all maner of sove brefee or aches take beane flower and yolkes of egge and role water and worke them together in maner of aplaiseer and Spread it one a cloth and Lay it to the Sove breat and amon the ache goe away for a string that growing on the leve led tak apeece of white lead and, beat it very smothe and nibbe the String nevy often ther wish agood breaten for the consumtion of the long es and allo for the cought of the longes Tak three vintes of Stronge mutton broath and pritt therin one handfull of sage of hieresalem and a smale bruch of rosmary and as much of thime thin boyle the 3 pintes to agree and give arasonabl draugh of the same to the party in the morning fasting and at fower of the clocke in the afternoone and less the party falt one hower after for one that is bitten with a madel of for a man to binen take the Liver of the dogg and dry it to powder and drinken but for absect be binen take the Liver in powder and the Claimes of Sea crabb allo in povoder and give it them in mile it of good also to let the beest bloud Take docke rootes and boyde them I'm faire runing water till they beetender then take them out of the water bruise them and strayne them then put a link varie Creame to it and see boyde them to gether till they wax like an oynt ment and see annoynt the fore with this salue producing beate Curvans and bayfalt together and mustard made with white woyne and lay it to the verite of the parient Let a Cloth bee Lay between this hath time often pued and sesaome falges any Take apint of Salsett oyse and 2 ounces of yellowe wax melt these toge they sitharge of yould 2 ounces also Litharge of Silver 2 ounces these must be put im rogether and Continewally sirved tell it Change blacke; venice, Ceruse 2014 Last the turpentine vohen it is will boy Led you may dropp in the Stirring frick into avale of water and if the dropps being taken out of the water feele soft then boyde in more if they feele hard then putt in a little more sallest on se if they feele indifferent then it is will and soe powere it may the vale of water one stirring it round till all Cleane to the sticke into the vale of water one stirring it round till all Cleane to the sticke for the Ache of ahalowe tooth ate Juy bervies and Seeth them in strong hyneger of wigne and suppo the Lignor in you mouth as host as you can and when it is cold word that and stake in more that is host doe this zorq tymes probation blacke wood didpped in oyse of finer almonds and put into her eares

Aspeciall remedy for the gone Take nery sharpe netses and netse the place unitall it blistes then take brock greate or deeres sewett or bores greate and mustand seeds braisfed and some garlick and the cleane wheate bran boyse them all in apan and lay them warme upon the netled place and it will drawe away the disease and help the party foreur This hath bine proned an hundred tyme never fay sed any A special water for the eyes if aman have Lost his sight io speeres he shall have in agame in to daye 3 face Red voles smallage maden his haire Endiss enfrace sengueene Redsennel Sandine of each halfe agranter of apound wash them cleane and lay them in white wyne to steepe, a whole day then Still them ma Stillory and the first water will bee like gold the second like silver and the third like balme then keepe in in a fasse for it is asmuch worth as basine for any mallady or sove eyees or for any fere other sove this mater is very pretions I dr palme An excellent water for the eyes 31 take a poste of may alive gathered of bayley a guarter, of an ounce of white copyis as much white sast, boyse all these together till they come to agrice to and keepe it in aglasse close coneved the salt must be valed in awett cloth in the embers and both the Salte and Copris smale beaten mis panger for apayne in the Stomake The aguare of good whire wigne and boyde in in ahandfull of Rue as sumuch Redsage aliste Cloud and mace 3 Races of ginger pricked full of hales anut meg steed lets is boy se till agranter be consumed then sweeten it which 2 ourses of browne Suger Candy zi sake the yelke of anew layed egg and beate in with a little mus kedyne and gente anumeg and myngle with it and of vend it upon a peece of towe and lay it to the parties temples, and it will cause him to take vest take the flowers of constayps and Still them and give the water of them to the for those that are frantick frantick to drinke morning and evening put of the water in the drinkes for the passy lay conslipps in malmely 3 days then fill it and drinke of in Jake aguare of muskedine and a handfull of cumsvary Rootes and leaves a handfull of earth wormes, Chopp them together smale and borde them in the handfull of earth wormed (hove them together smale and boyse them in the mulkedine till it be consumed to a winter then bathe the place greened with it warme mulkedine till it be consumed to a winter backe for weakenes in the backe for weakenes in the backe for with 30 or 90 almonds banch-lake the pithes of 20 v 3. Racks of neale stampe them with 30 or 90 almonds banch-led when they are beaten never small sent vs on the first in 3 spoonefulls of ed when they are beaten never small sugar halfe agreet mut megg sliced and plantaine water and of much ved rose water halfe agreet mut megg sliced and small water double refused sugar or manus christias will sweetened and taske first and eate the quantiti of anut megg morning and evening

Ir water Raleighs Cordiale is an approved antitlete against all Contagions disseases as the plague purples smale pax measles and the like for prevention whereof a spoonefull is to be mixed in an indifferent draught of beere and to bee dranke in the is to be mixed in an indifferent draught of beere and to bee dranke in the morning fasting but to the infected give 3 good spoonefull inixed morning fasting but to the infected give 3 good spoonefull of angellica or Cardus water that in distilled cold only with & spoonefull of angellica or Cardus water in Clara no source. of the hearbe and for want of thise water in closere possen dranke with by pucking a moderate sweate will expell the malignity of the mallady the gatient must be keepe temperately theme: it is likewis an experiented, remedy in a wintent fairfest and when the Stomake is oppressed with wynde cold Hegme or any supfluity it is effectually disgestine and in these cases to bee dranke of in Selfe when there is occasion 3 good spoone fulls without any other mixtwee Spirit of Clary Is an excellent restorative in any sinde of weakenes, but cheefely for that of the back wich is much mableth is preserveth such as are incident to Consumptione of Comforteth the hart health the incerated Loungues and is agreat Strengthner of women after theire delineance to be taken morning and Guennig 2 2 good spoonefulle no atyme it may also be taken at meales the same guantity in aglase of Sacke or Canary wine pirit of mynes Is an exceeding comfor table Cordial and rectefyeth the infirmities of the from make strengthness the vetenting facultie thereof stayeth nomiting prenenteth the passion of the hart and cureth those that are troubled ther with st comporteth the nitall spiritte preserveth the somake and longues from passion of the minute has not a secure and is an intelligable remode. purvefaccion expeller minde helper disgesture und is an infallable remeder aganist massanchossy to bee taken 2 good spoonefulle at a tym when ther Treacle Water: For an exellent remedye for all defeafer of the Esleene and is now less effectivall to prevent then extill the malliginity of any manor of contagion And when it is taken as an Antidote a spunfull in the morninge Suffizeth but to the inforted three good spunfulle and the partye to great after it but for the defeases of the Esleane two spunfulle att a time when thour ir occation Take oken bouds and boys them in frise briner and seron in Lake Senseed sag Safefir boyd in mile til in Com it and to again the

is for the piles the reasage in mary and stampe it and stray ne out the ince of it boyse it with good hours to assint of liquor of say put halfe apint of hone, and when you up in war in on alymen Cloth for a the Collick in Children te mustaire seede sampe them and svagne them in good use and lett the thilde drinke in faling for a surfer of meate or any thing eaten 38 Jake a wheaten Loufe and cut of the toppe and bottom and from the midle part Cutt agood thick toast, toast it nevy dry and burne it not then take of the best agranity mto adish on coses and turne the toals init till have drunke upp all the agreatity fand bee nery hott then lay in as hott as you can suffer in to the pitt of the Stomake this hath helped many Spirit of Roses, It good for opening the longues and healeth the incernional of frem and per venteth the inflemities theof and preserveth them from putre faccond and the breath from beeing Corresped it is to bee taken in the, moving fating and as & of the clock in the ofter none and at night going to bedd a poonefull att atim Is good aganist Solving from the somake and suppresent the malignant fuines arrising from thence into the head and forceth them downe worth it is likewise good for prenentona of appoplexic the wertigo and all disceases of that kinde and is is an effectual expeller of winde to bee taken morning and even ing aspoones will attach a persone and appople and a popular feelt, wast it nery cleane with white wine then take rosen Tinely beaten and open the wound as wide as you can and Jill a upp with Resen and see bynds it upp and you need open it not more and it will heale with out any scar 53 boyd whim floten milite and reach allow together and wash the place with ut ancient of honority and princh femily water in appear of first and a spen weeks

amedecine for him shat is diseased with the Stone and cannot possibly make water ake garden snagdes and say shem by the fix side the hete whereof will cause the may les to creepe out but be assured you have them Cleane out then take the shells and wash them often tell thay bee very Cleane and dry then in an oven when beate them signe and drinke them with white when beate them signe and drinke them with white when and this will cause the patient to arroyal of war, alo take 2 or 3 readish roses and scrape them cleane cut white my ne and rootes them in peeces then take lik grantity white my ne and rootes boyse them both together and drinke the my ne and rootes indiffirent warme for the stomake and spleene Indifferent warme for the Stomake and Speene

Take holly thiste Speeremynt magnort and clresse them

and look a and seeth agood handfull of them in alle and put to it a lettle pepper and drinke it in the morning fatting it bathe the spleene side with mith white wine warmed until winnave and then annoynt it with the onle of capers and onle of sweet almonse myngles regerber apreserminne against the plague ake 2 Spoonefull of Jeane Grant de greackle and 3 Spoonefull of white wine unneger, and 2 spoonfull of fine condit water and of Servell roote the quantity of a walnust grated mingle all this regether and drinke this roll with angelica roote and with a posset alle with angelica roote Take a Clone of garliet pull in till the white appeare but besome noe quice followe for that will blister the lave drawe a threat shrouge clone of garlicke and ije apole knott on the end of the threal that it Sipp not of britt may bee drawne out of the care by the other end then lay is in Jacepa is hower good English hong bee for you use it then put it in to your deafe leave when your goe to bedd and lett it remayne 29 howers and soe renewe to bedd and sen in electrony for a Cold much mayden heire tak a handfull of the powder of Cold foote as much mayden heire halfe ahanceful of liquorish and Smuch femal seed bearen and learnced and on onnce of Suger Candy then make a sirrop with Inger and hisop water

The good Creame and beaneflower myngle the that be as wick as a poulties then put in to it 2 or 3 spoonfull of the orde of roses wered it on a lynen Cloth and lay it to the Sove changing it stall to the face to alor sike strong see and when it is aday, or 2 old put in ahandfull of Theofore it bee to dry wormewood as much red sag asmuch to bay seares boyse then well tog ther and with a wooden Cloth west it as host as you can suffer it Six figge Samped in ahandful of mustard seed asmuch Cumen Just Juge Jumpen munimitude of mill of the best un neger and jud ahandfull of bay Sadt with a spoonefull of the best un neger and 6 blake Snayles without Shells stamped with ahandful of verlage
and borded in openite of runing water untill it bee thinck and so joe lass it to wish beanemente Month of and picked then boyle is unsill it bee Consumed to the fister against human and picked then boyle is unsill it bee Consumed to the fister against walked and picked then boyle is and some and some in an analysis in the sound in the fister against the sound in the soun wasned and picked men boyle it untill it bee Confirmed to agrave but wasned and picked men boyle it untill it bee Confirmed to five againse featen for it is usery Cleane and strayme it and set it while then set it and put there agraves of apound of super apoints while then set it and put there agraves out the five apoint it incomed and super and super out it is a super apoint it incomed and super and super apoint it incomed and super and super apoint it incomed and super apoint it is a super and super and super apoint it is a super and super and super and super and super apoint it is a super a super apoint it is a super a alcoding and when it is cold pries is inso about the same of the s lett it bee 3 dayes ald before you drinke of it then drinke of it me is me is for the meaself and smale pox to bring them out them rate

Jake a handfull of figgs and wipe them till halfe be walted

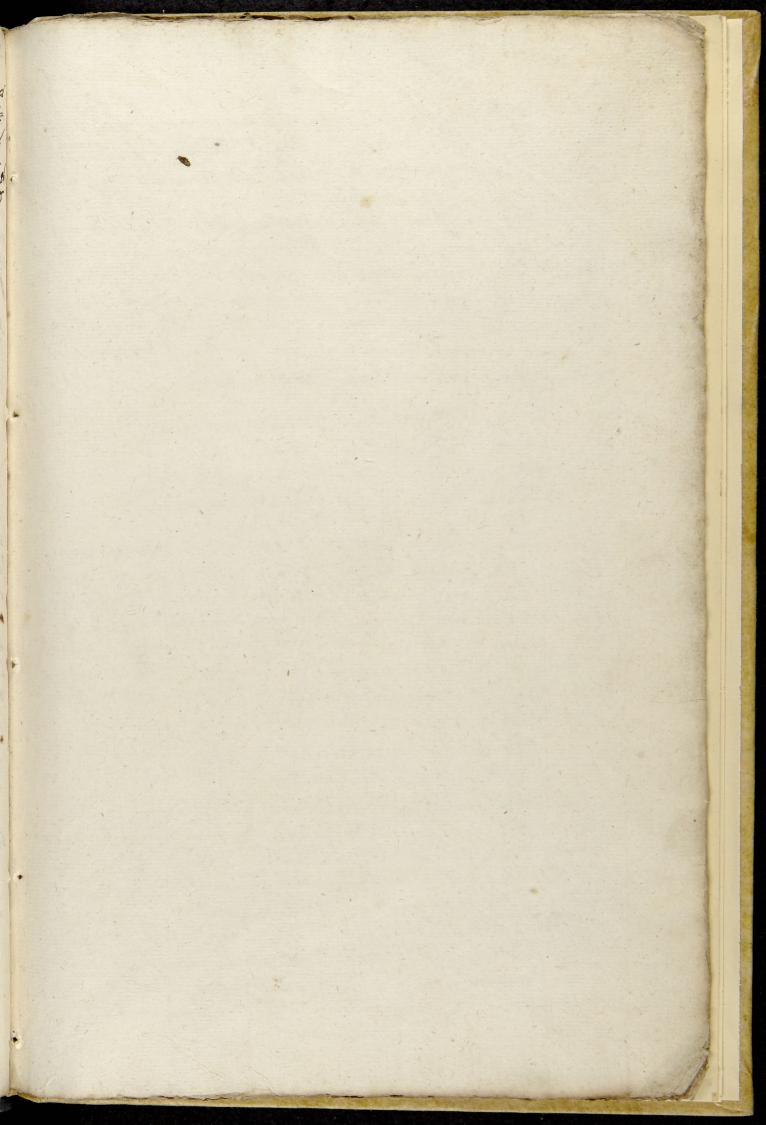

mine of state ale and leath wour figgs therein till halfe be Jake a handfull of fight and wine there in till halfe be was teed and grinte of state ale and Seeth your fight of the same lines of state ale and seeth of such a state some since of state and seeth of such a state some since of state and seeth of such a state some since of state and seeth of such a state some since of state and seeth of such as some since of state and seeth of such as some since of state and seeth of such as some since of seeth seeth such as some since of seeth seeth such as some since of seeth grinte of state are and seeth your sign merem the native and put there

Some signer and the patient

Some is Cleane then take advangation and give it mame to the patient

to alite powder of good English Soft on and give it mame to the patient A fake an english heade hogg and grander in im poeces and put him Take an english neage hogg and quarter it in poeces and put him face an english neage hogg and quarter it in poeces and put of im a faier still with this ingredience first aguarter of ved with this ingredience first aguarter of suger the waight of pence in Cynomen a Rose water aguarterne of suger the waight of pence in Cynomen a Rose water aguarterne of suger the waight of hand full of normal handfull of great ray some twelve dates so handfull of neppe

fake a fatt sove vigg and vitte in to faire stillory of speerement red fennell rednesses of eich on hand full of Clary sinerwork of eech halfe out wash them Cleane in 2 or 3 waters halfe aguarter of an otince of mace 2 sticks of good Cynomon bruised and alistis there together with a life fier and pitt it into aswe glasse and sat it in the sun gother with and see drinke of at at your pleasure

A Medecen for the Mother Lake a grant of some stom and cravificit over the fier am fine it very cleane, then take a hamfull of woodbine Desied, and a hamfull of Roforary bodds Am Roforary flowers deied Am stampe them fine in a morter, Am put it to the Hom, am let them boyle halfe an hower, Am take and straine the herbes from the home againe Intill it be somwhat thicke. Am beepe it close in a wide morther glaffe. Am take thereof to the grantety of a Beame lo often as you feele your leffe greeted with the faire defeate. Am you must meither eate mor drinke within two howers after I this medecin will contime well a whole yeare. An aproved medecime for the rifinge of the Stomoche am fallinge ichnes although Lady Cefer am by her am others exprosed. When you perceive the fift of the fallinge fictimes to come then give the partie thre or fower good ponfulls of spirmints water am libewife at might when the party goeth to bead And this give the party greeved this grantely untill he have taken the the grantety of a pinte: It may be given to Inchange chitoren, but if thay will not take it alsome you may put a smalle quantity of Shower therin but it is better to be taken allowine: A dempe for the sampley of Dropley taught by m panton the philition! + are fower gallons of Ale, one bushell of ston vegrall picked verio deane, two hamfulls of watercreffes that growth by the water water live take a famich Brooklime am stampe all the le together tweather in a faire + rngg + hen take two omees of longe peper and benje the fame and two omness of Graines and make a bagge and part all these thinges therin then left the same hange in the barrell where you put your Ale: And fo drinke a good draught drangte of the faime werie morninge or at any tyme of the day'e when you will felt the fame Stand a weeke before you dembe the tame: // U

of o make a guilt to dry up colde homors in the head: 11 -ate Romaine flowers picked cleane from the greene and dry them in the same am then take Masticke am beatest into ponder and allo the flowers and mingle a like quantetie of the everall pohoers together but rather more of the pomber of the flowers, then gill dry tough upon a cloath then strow the powder all upon the tough very thicke then cover it over with Sax net am make a bagg therof grilled and at night when you goe to bed there omist be from of the powder o cast into the fire and the guilt hits over it and then lay one the Crowne of the head warme am weare it contimally ever Vinge it as afore: for want of the flowers you may take the Rofmany topps An aproved me deconfor the greene filme//e: + are of the powder called Gerepegra, a french Crowne waight Am to well the same take a sponefull of Malmey am make the same in three littles and weappthem in the papp of an Aple and lett the patient take the fame in the morninge fastinge three weekes or a Moneth together am fast w two howers after it: to make plage water beinge good allo for the grantern Agne or am defeate hinge aboute the Stommoch: fate of wormwood of Dimpernell and of Dragon of eath of them a powme and liberife liberife take of Sallendome Rosemary Sage Betom Mingwort Rew Scalines Egremony am Mynts of eatch of the le half a ponne, let them dire one day, and then beinge first thepped chopped put them into a close pot am put there a Gallon of white lime and lett them bake tower am twentie howers together Am then Still them am put the water into glaffes, And give to the patient of as come as he is greeted term to spoonfolls to dembe blond warme And If thay be habell best them walke after it, if not belpe them, and gibe it them before thay leepe and lett them neither eate nor deinke in two howers tofter: / the elder the water is the better / proved: Amo also Tre berries stamped am dennte areverie good against the plage:

A Meddecine for biteinge of a madd bogge or stinginge of an Adder:

Take a handfull of has ill nutte and a quort of a handful of Kew and a clove of Sarlich stampe all these together, then take the ince of these and put m a little treache to it And if it be a man that is stonge or bitten give it him to drinke in the Beere or pine but if it be a bog give it him in milke then take that from phence the ince cometh out and binde it to the place that was stonge or bitten and it will help it:

A water for the bitemge of a madd Dogge !

Take Grabias weld Sage Mattolm with purple flower right shoulde with the blew flower yarrow and lillier of eatth a like quantety still the all together and when you have distilled the said herbs. take a sottle o milke pottage or mornke and put therm sixe spunfull of the said water and one spunfull of treakle and give it to the partye greived to drinke or eate and it will healy incontinently soe it be given within mine dayes after after the scartye is bitten. Frould by the La: Dacres

for a record wellinge of the legge am records of the fame or any other place:

pred it I pon a limen cloath am laye it to the place greed:

A very good medecin for an Agne fallen into the lego or any other parte of the body: If the youlkes of two logs and beate them verie well to gether then dipp therm limen clothes and beate them verie well to gether then dipp therm limen clothes and laide by an the place where the Agne is and to fast as thay beginn to warme take them of and laye one fresh till furth tyme as the heate the abated I provedly mit wystow:

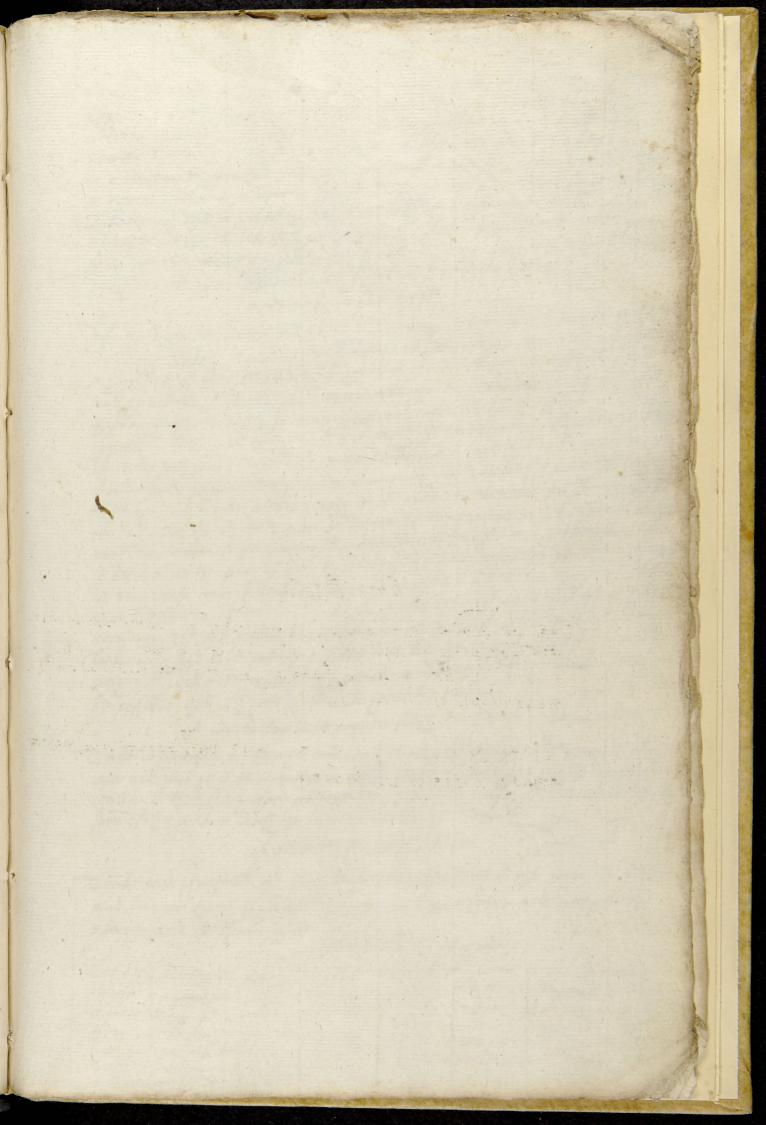

The makinge of Joyce Lycoras
good to stay the Romine and
preferre the Longes.

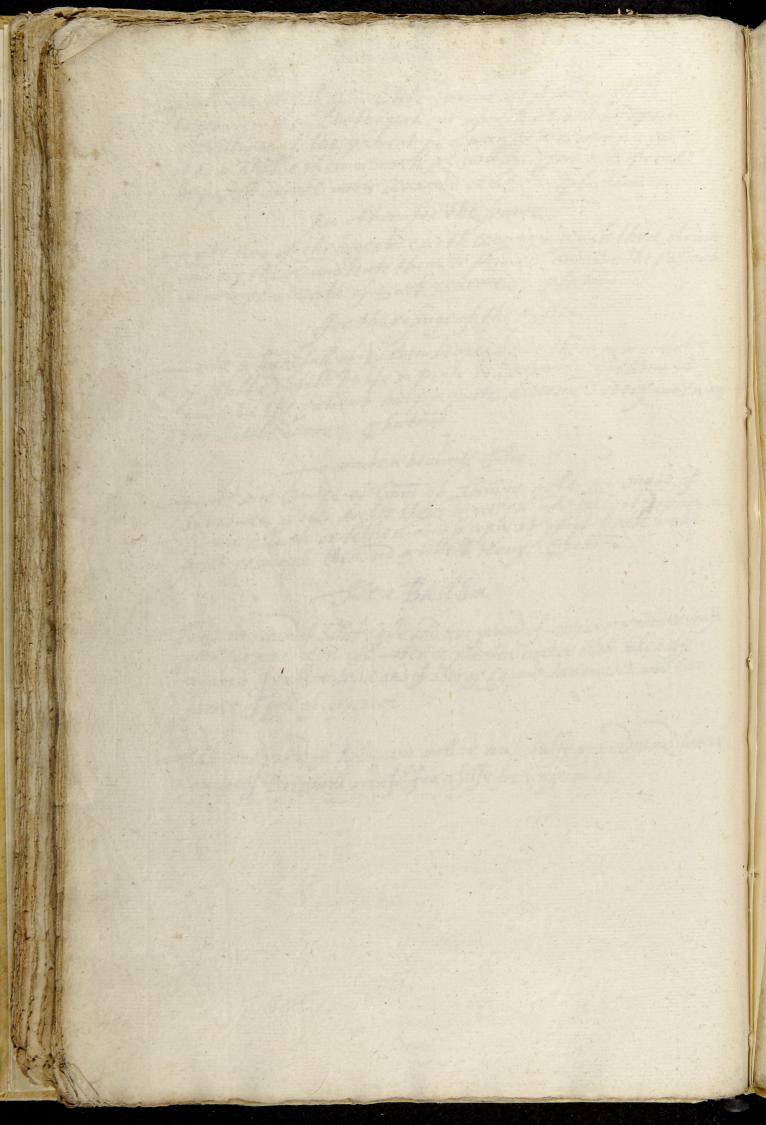

one hamfulles of the topps of Hoppe Romaine flowers one hamfull of the leaves of Colts fast fower handfulls, stampe them am take the ioyce of them am put to it a pinte of Hopp Thomp water, or els riminge water unto all these put fower onnces of Lycoras finly beaten, am seazed, then set it one the fier am boyle it untill it be as thicke as creame then straine it through a fine strainer, am set it agains to the fier am stir it continually till it boyle, am in the boylinge put thereto fower onnces of yellow shager canny let it boyle till it will evit your stiringer of it rise from the potts bottome, when it is made, then take it from the fier am when it is that you may handel it, make it upp in cakes am Rowles as you like best.

An approved meddecine or mater mater to Arenthen the Backe and such or be fallen into great weakness.

Take a quart of milke of a redd con the yeolker of twelve or more new layd Figgs one quarter of a jound of cas dates, & stored and white fibres beings taken out and the dates start Shredd perg small Take at also a good handfull of redd niffe one handfull of clery the said herts being shrudd very small and a synt of redd some mater with a found of Suger Let all these things be compounded and well stured together and then distilled together and let the weaker bersons drinke thereof mornings and enemings and use to suit in their broather and by Sode grace they shall sing great healfe and strenth thereby:

Hor a Conbultion: fate the Miffell of a white - horne dry it and beate it I to powder then give the patient afronch as will be byon a shillinge of the patient be a man or a woman: of it be a chilbe then a smuch as will be you a fix pence in poffett deinte and warmed or sacte: platom Another for the feame: take two of the bigest earth worms wash then deane am dry them am Beate them to powder am give the patient it in a pennisonth of Sach warmed: phatim for the rifinge of the Lighes: take a hamfull of berben leaves boyle them in a grant of Mille vitill halfe a pinte be confirmed straine it am give the patient half a pinte kvarmed every morning unhilit be doone: platim. -to make a healinge salve: Tharrowes grece melte them to gether and fored it por a limen clouth or lether and so apply it yet heate not fast ye nough then and a littell thomy i poation: -for a Ball form Jake to pound of Sallet Cylle and two pound of benus tox petime wash your terpen time in refe water or planten water then take halfe a pound of yallow wax and of storap Lyquid two ounces; and two ounces of oyle of hipercon Jake one yound of Rosin: and yashow wax halfe ayound: and foure ounces of Barrowes grease: for a salfe for anye sting
